## Dimensions

## Features

### iHCP

- Dispenser connection system compatible with most brands and models.
- Completely modular and easy to maintain.
- 19" aluminium structure with desktop or RAK versions.
- Scalable without dispenser limit.

### SCP

- Interface program between iHCP and POS System/terminals. It runs as a service in the Front Office terminal.
- Allows the dispenser control: blocking, unlocking, presetting, reading totalizers, etc.
- Work modes: traditional, postpaid or prepaid.
- Supply records.
- Reading of pump alarms.
- Change of prices at the pumps and/or totems.
- Connection with POS and Alvic and/or third-party terminals.

## Design

- Modular and avantgarde design.
- Industrial control equipment with high performance and high reliability.
- 19" aluminium structure.
- Desktop or RAK versions.

## Operability

- It allows you to control different brands and dispenser models in the same installation.
- Allows you to control price markers (totems).
- Completely modular and easy to maintain.

## Alvic CPU card

- Individual electronic interface for each dispenser.
- Possibility of extraction and hot change (Hotswap).

## Characteristics

Colour	Alvic blue / Grey
Dimensions	425 mm x 88 mm x 148 mm

## Electricity

Max. Power	40 W
Power supply	110-220 Vac

## Connectivity

Communication type with the Host	RS232, RS485 HALF DUPLEX, Ethernet
----------------------------------	------------------------------------

## Capacity per equipment

Card number	Hasta 6 o 14 CPU (según modelo)
-------------	---------------------------------

## PC Communications Card - iHCP

Transmission and reception light indication	PC / iHCP
Voltage light indication	5Vcc

## Back Panel

Connectors	2x16-way DIN for CPUs / 6-way connector for dispensers. RJ45, USB
------------	---

## Certifications

CE, FCC, BSMI, VCCI, CCC, RoHS compliance, UL, NOM, ALCANCE, CB Internacional, RAEE
